

# HTML Video

[◀ Previous](#)[Next ▶](#)

The HTML `<video>` element is used to show a video on a web page.

## Video

### Example

Courtesy of [Big Buck Bunny](#):

[Try it Yourself »](#)

## The HTML <video> Element

To show a video in HTML, use the `<video>` element:

### Example

```
<video width="320" height="240" controls>
  <source src="movie.mp4" type="video/mp4">
  <source src="movie.ogg" type="video/ogg">
Your browser does not support the video tag.
</video>
```

[Try it Yourself »](#)

## How it Works

The `controls` attribute adds video controls, like play, pause, and volume.

It is a good idea to always include `width` and `height` attributes. If height and width are not set, the page might flicker while the video loads.

support the `<video>` element.

## HTML `<video>` Autoplay

To start a video automatically, use the `autoplay` attribute:

### Example

```
<video width="320" height="240" autoplay>
  <source src="movie.mp4" type="video/mp4">
  <source src="movie.ogg" type="video/ogg">
Your browser does not support the video tag.
</video>
```

[Try it Yourself »](#)

**Note:** Chromium browsers do not allow autoplay in most cases. However, muted autoplay is always allowed.

Add `muted` after `autoplay` to let your video start playing automatically (but muted):

### Example

```
<video width="320" height="240" autoplay muted>
  <source src="movie.mp4" type="video/mp4">
  <source src="movie.ogg" type="video/ogg">
Your browser does not support the video tag.
</video>
```

[Try it Yourself »](#)

Element					
<video>	4.0	9.0	3.5	4.0	10.5

ADVERTISEMENT

[REMOVE ADS](#)

# HTML Video Formats

There are three supported video formats: MP4, WebM, and Ogg. The browser support for the different formats is:

Browser	MP4	WebM	Ogg
Edge	YES	YES	YES
Chrome	YES	YES	YES
Firefox	YES	YES	YES
Safari	YES	YES	NO
Opera	YES	YES	YES

File Format	Media Type
MP4	video/mp4
WebM	video/webm
Ogg	video/ogg

# HTML Video - Methods, Properties, and Events

The HTML DOM defines methods, properties, and events for the `<video>` element.

This allows you to load, play, and pause videos, as well as setting duration and volume.

There are also DOM events that can notify you when a video begins to play, is paused, etc.

## Example: Using JavaScript

Play/Pause   Big   Small   Normal

Video courtesy of [Big Buck Bunny](#).

[Try it Yourself »](#)

Tag	Description
<u>&lt;video&gt;</u>	Defines a video or movie
<u>&lt;source&gt;</u>	Defines multiple media resources for media elements, such as <video> and <audio>
<u>&lt;track&gt;</u>	Defines text tracks in media players

## Less admin, more teaching

Focus on what you do best: teaching. Everything is structured and easy to manage, so you spend less time organizing and more time guiding your students.

## Valuable insights

Track student progress and identify learning gaps.

## Simple to use

No installations, no complicated setup.

## No experience needed

Suits both beginners and experienced teachers.

Classes	NAME

Interactive Quiz App	<a href="#">Code project</a>	Create a quiz where users can select answers and use JavaScript for scoring.
Personal Portfolio Website	<a href="#">Code project</a>	Students build a simple portfolio using HTML, CSS, and optional JavaScript.
Student Grade Calculator	<a href="#">Code project</a>	Develop a program that calculates a student's average and grade.
Basic HTML Structure	<a href="#">Code challenge</a>	Test students on creating a basic HTML document with a title and a heading.
CSS Selectors	<a href="#">Code challenge</a>	Challenge students to apply different styles using various selectors.
CSS Selectors	<a href="#">Code challenge</a>	Challenge students to apply different styles using various selectors.

## All in one platform

We know you already manage multiple platforms, LMS tools, communication apps, tracking systems, homework platforms, and digital textbooks.

W3Schools Academy makes it easier to teach coding by keeping everything in one place. No extra software, no complicated setup.

[Product demo](#)

## Access to all certification exams

Students get access to all W3Schools certification exams. Each exam is automatically graded, giving you a clear overview of your students' progress without extra work.

Certificates are a great way for students to prove their skills and add something valuable to their portfolio.

[Read more](#)

## Support your students at every step

From the first lesson to the final exam, students progress through structured courses, hands-on challenges, and certification exams, building real skills and staying focused.

## Online IDE for your classroom

With W3Schools Spaces, students can build and test projects directly in the browser, no setup required. It's an easy way for students to apply their skills, experiment with code, and share their work with others.

### 30+ coding languages

Students can build projects using HTML, CSS, JavaScript, Python, and more.

### Quick start with templates

Students can choose from over 75 templates or customize their own.

### Create projects their way

Students can build websites, web apps, or fullstack solutions.

## Student data stays private and secure

W3Schools Academy is designed for education, not data collection.

Schools and organizations can trust that student information is protected.

### No targeted ads or data sharing

Student data is not used for marketing or sold to third parties.

### Minimal data collection

We only collect what's necessary for learning, nothing more.

### Built to meet privacy standards

Complies with GDPR, FERPA, COPPA, and other regulations to keep student data safe.

### Control over student data

Teachers and students own their content and can request access or deletion at any time.

### Secure by design

Includes encryption, secure access controls, and regular security updates.

### Transparent Practices

We are transparent about how we use data and provide tools for managing privacy.

## Powerful Code Editor

Front-end, Back-end or Full-stack - the choice is yours

This template is beautifully designed and organized, with a clean and user-friendly layout. It utilizes flex containers for effortless positioning and employs SVG backgrounds to create a visually appealing and unique transition between sections. The contact form has implemented reCAPTCHA functionality for greater security, making it easy for visitors to reach out and communicate with you. Overall, a great website that effectively showcases your offerings.

This project serves as an example of what can be achieved. It is not a fully functional product. Feel free to use the source code and ideas as a starting point for your own projects.

This is only one of the many templates available from W3Schools. Check our [tutorials for frontend development](#) to learn the basics of [HTML](#), [CSS](#) and [JavaScript](#).

#### Knowledge requirements

To be able to fully understand a template like this and adapt it to your needs, there are several things you should know (or learn):

## Learn HTML

HTML is the standard markup language for Web pages.

With HTML you can create your own Website.

HTML is easy to learn - You will enjoy it!

### HTML Tutorial

Study our HTML Tutorial for free,  
no registration needed.

[Learn HTML Now »](#)

OR

### HTML Course + Certificate

Upgrade your learning with our  
interactive HTML Course and Get Certified.

 [Upgrade to our HTML Course](#)

Tip: [Sign in](#) to track your progress.

## Learning by Examples

With our "Try it Yourself" editor, you can edit the HTML code and view the result in the browser:

```
<!DOCTYPE html>
<html>
<head>
<title>Page Title</title>
</head>
<body>

<h1>This is a Heading</h1>
<p>This is a paragraph.</p>

</body>
</html>
```

[Try it Yourself »](#)

**Click on the "Try it Yourself" button to see how it works.**

## HTML Examples

This tutorial supplements all explanations with clarifying examples.

Many chapters in this tutorial end with an exercise where you can check your level of knowledge.

## Exercise

What is a correct syntax for an HTML hyperlink?

- `<a href='/home.htm'>Visit W3Schools.com!</a>`
- `<link href='/home.htm'>Visit W3Schools.com!</link>`
- `<alink href='/home.htm'>Visit W3Schools.com!</alink>`

[Submit Answer »](#)

## HTML Quiz Test

Test your HTML skills with our HTML Quiz!

[Start HTML Quiz!](#)

## Track Your Progress

Create a W3Schools account and get access to more features and learning materials:

-  View your completed tutorials, exercises, and quizzes
-  Keep an eye on your progress and daily streaks
-  Join the leaderboard and compete with others
-  Get your own avatar and unlock new skins

**Note:** This is an optional feature. You can study at W3Schools without creating an account.

## HTML References

At W3Schools you will find complete references about HTML elements, attributes, events, color names, entities, character-sets, URL encoding, language codes, HTTP messages, browser support, and more:
